Telecommunications Equipment Suppliers

## Industry leading return on investment solutions

### Your Asset Recovery Partner

Non-utilized, aged and obsolete equipment means cash for Midwest Digital, Inc. customers. Midwest has developed an extensive network of buyers in need of refurbished equipment on a daily basis.

Midwest's network of strong relationships include a vast number of refurbishers, equipment manufacturers, telecommunication manufacturers, leasing companies, third party maintenance facilities, retail chains, recyclers, large end users and asset recovery management teams . . . all buyers of equipment no longer used or needed.

Midwest expertly determines the value of excess equipment quickly and accurately to expedite customer return solutions.

### Maximizing Online Customer Solutions

Midwest designs and maintains hundreds of specific customer driven programs maximizing profits and minimizing liabilities on excess customer equipment. Through an advanced computer bar-coding and reporting system, Midwest is able to track inventory and needed equipment quickly.

Customer documents provided:

- monthly inventory reports
- sales activity reports

- destruction of scrap certificates
- lot activities
- lot closure statements
- monthly settlement checks

### Environmentally Responsible

At Midwest Digital, equipment which may have limited or zero value is reduced to core components for recycling. Improperly handled, these materials can become a major environmental liability.

Midwest is experienced in environmental recycling, consistently exceeding all state and federal EPA, DOT and OSHA regulations.

Few responsibilities are greater than to preserve the earth for future generations. Choosing Midwest as your disposition agent is not only a sound financial decision, but it's a decision to help protect the world in which we live.

### Superior Testing and Reconditioning

A hallmark of Midwest Digital, sophisticated testing, repair and refurbishment, as well as, re-configuring facilities is the product of a responsive staff and facilities designed for the ever changing industry.

Positioned to respond to changing technology and testing challenges,

Midwest's repair turnaround is exceptional in the industry. Service by Midwest enhances the value of consigned material turning obsolete and damaged or defective equipment into a re-marketable quality product providing a greater return on investment for customers.

## The sensible choice

### Warranted Solution

Midwest Communication Products, Inc. is a full service supplier managing surplus and refurbished central office circuit boards for switching, transmission and outside the plant.

Experts in procuring and maintaining the type of high quality inventory customers rely on for their plug-in requirements, Midwest's hallmark is delivering quality replacement plugs to meet immediate demands.

Midwest clients include nearly every major telephone company in North America, as well as, numerous smaller independent telephone companies and a growing international clientele.

Midwest's Database Reporting System assists customers to effectively plan for future purchases, eliminate downtime and significantly improve the bottom line. The flexible DRS system provides multiple monthly sales and consignment reports for various Midwest customers' departments and divisions.

Midwest procures plug-ins from a variety of sources including Original Equipment Manufacturers (OEMs), Regional Bell Operating Companies and Independent Telephone Companies. Working with exceptional equipment manufacturer resources combined with the highest quality standards,

Midwest offers a superior selection of premium OEM equipment.

### Premier Inventory

For more than 12 years, Midwest has provided customers with one of the best inventory selections in the country. Midwest carries products by the world's premier manufacturers:

- Alcatel
- Nortel
